Advanced Front End Web Development
Data Structures and Algorithms

100 Days of Code
August 2018 – May 2019
Coded every day, building projects, expanding skills, blogging, and making connections in the industry

Experience

Front-End Developer
Greater Than One, New York NY / remote in Cork, IE
May 2019 – Present
- Create sites for 2 main clients; current project uses Gatsby+React coupled with headless Drupal CMS
- Incorporate Babel, CLI, Git, and a11y best practices to dev workflow
- Known for thorough and accurate delivery of projects under strict timelines; project and account managers request me for their teams
- Demonstrated quick learning when assigned as "Drupal expert" despite limited previous experience and deployed a site in Drupal within weeks
- Positivity and energy has my boss calling me the team's "morale officer"

Junior Analyst
ArtSci Health Solutions, Sparta NJ
August 2017 – May 2019
- Responsible for all technology at pharmaceutical consulting start-up
- Maintained website and social media
- Created, coded, and designed additional websites for conferences

Projects

React Quiz App
potternamegame.herokuapp.com
July 2020
- Developed and deployed React Harry Potter quiz application and gave a presentation on the project
- Functionality and elements include timer, data structures, deep copies of data, automatic game start, display of results

Thrift Spending Tracker
September 2018 – May 2019
- Implemented async-await, user authentication, Model-View-Controller architectural pattern, and integrated APIs
- Coded with Node.js, Express, and MongoDB to build a spending tracker web application
- Utilised JavaScript ES6, CSS, HTML templates (Pug/Jade), and Git

Challenge Channel Productivity Site
September 2016 – December 2016
- Responsible for front-end code on team building a productivity web app
- Presented completed project to an audience in a professional setting
